

# Macon Coliseum Floor Diagrams - 200 Coliseum Drive, Macon, Georgia

**IMPORTANT NOTE!** The Head Judge position is always the half-way point of any drill barrier. Spectators enter Inspection rooms BEFORE the team enters. Spectator seating within the Inspection event is limited however standing room is also available. **QUIET MODE IS IN EFFECT UPSTAIRS AT ALL TIMES!**

## Second Floor View - Inspection Room

### INSPECTION DIAGRAM - ENHANCED

Schools are reminded that fair play dictates **members of your program watch your school inspections and no others!** Ensure you enter & exit through the correct doors

Usable inspection area space is 20' wide by 30' deep. Head Judge will place against the wall at the exact halfway point (10'). Judge 2,3,4 will place against the side wall. As with any tight room configuration, judges will look for the team to open ranks without crowding the Head Judge (2 paces away from the C/CDR to Judge and/or the C/CDR to unit). Cadets may enter/exit in any military manner they choose. HINT: Simple Fall In/Out command looks sloppy and never plays well with judges.

## Ground Floor View - CG, Reg, Exhibition
